

Hammad Khan

Peshawar, Khyber Pakhtunkhwa, Pakistan | hammad.khann058@gmail.com | [linkedin.com/in/hammadkhan-702610328](https://www.linkedin.com/in/hammadkhan-702610328)

PROFESSIONAL SUMMARY

Aspiring software engineer and AI enthusiast with hands-on experience building mobile applications, voice-controlled AI assistants, and user-centered digital solutions. Pursuing a B.S. in Computer Science at UET Mardan with a strong foundation in algorithms, data structures, C, C++, and Python. Passionate about the intersection of artificial intelligence and real-world software — from developing intelligent voice assistants to building scalable, user-focused apps. Proven ability to collaborate on real-world product development in a fast-paced tech environment. Seeking to contribute to Google's mission of organizing the world's information through innovative, AI-driven software solutions.

EDUCATION

University of Engineering and Technology (UET), Mardan Mardan, Pakistan
Bachelor of Science in Computer Science Sep 2024 – Sep 2028 (Expected)
– Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Software Engineering, Database Systems, Discrete Mathematics
– Active member of the Software Technology Park — an innovation hub for student developers and entrepreneurs

EXPERIENCE

ALGO HUB — Software Technology Park, UET Mardan Mardan, Pakistan
Graphic Designer & App Developer Dec 2025 – Present
– Designed and developed user-focused mobile application interfaces, improving UI/UX quality and visual consistency across multiple product screens
– Collaborated with cross-functional teams to deliver functional app features aligned with user requirements and product specifications
– Built and iterated on interactive UI/UX prototypes, incorporating feedback loops to improve usability and design fidelity
– Applied principles of human-computer interaction and accessibility to create intuitive digital experiences for end users
– Contributed to graphic design assets including icons, layouts, and branding elements used in live product deployments

PROJECTS

Quiz App for Teachers & Students | *Flutter, Dart* 2025
– Built a full-featured interactive quiz application enabling teachers to create multiple-choice quizzes and students to receive real-time feedback
– Implemented progress tracking and performance analytics dashboard, improving learning measurability for educators
– Designed an intuitive, accessible UI following Material Design guidelines to ensure ease of use across age groups

Jarvis — Voice-Controlled Virtual Assistant | *Python* 2025
– Developed a voice-activated AI assistant capable of performing web searches, launching applications, and responding to natural language commands
– Integrated speech recognition and text-to-speech libraries to build a functional human-computer voice interaction pipeline
– Demonstrated foundational understanding of AI concepts, Python automation, and system-level programming

Bank Management System | *C* 2024
– Built a console-based banking system in C supporting account creation, deposits, withdrawals, balance inquiries, and transaction history
– Applied file I/O for persistent data storage and implemented structured data handling using structs and pointers
– Reinforced core programming concepts including memory management, modular design, and error handling in a systems-level language

Hospital Management System | *C++* 2024
– Developed an OOP-based hospital management system in C++ to manage patient records, doctor assignments, and appointment scheduling
– Leveraged classes, inheritance, and polymorphism to model real-world hospital entities and relationships
– Implemented file-based persistence and search functionality to efficiently retrieve and update patient data

TECHNICAL SKILLS

Languages: C, C++, Python, Dart, SQL, HTML/CSS
Mobile Development: Flutter, Mobile UI/UX Design, Responsive Layouts, Cross-Platform Development
Design Tools: Adobe Photoshop, Adobe Illustrator, Canva, UI/UX Prototyping
CS Fundamentals: Data Structures, Algorithms, OOP, Operating Systems, Computer Networks
Soft Skills: Team Collaboration, Project Coordination, Problem Solving, Communication, Adaptability

ACHIEVEMENTS & ACTIVITIES

2nd Place — Tech Competition 2025, Graphic Designing Category	Mardan, Pakistan
<i>Department of Computer Science, UET Mardan</i>	<i>2025</i>
– Secured 2nd position among university-wide competitors in the Graphic Designing category, demonstrating advanced design skills and creativity under competitive conditions – Recognized for strong visual communication, layout proficiency, and design execution against peers across all CS batches	
ALGO HUB — Early Student Contributor	Mardan, Pakistan
<i>Software Technology Park, UET Mardan</i>	<i>Dec 2025 – Present</i>
– Selected as one of the first student contributors at ALGO HUB, a professional tech hub within UET Mardan, shipping real-world apps and design products
